

Technical drawing of a cross-section of a road structure. The drawing shows a road surface with a central section of 2470 units and side sections of 1000 units. The total width is 4470 units. The road surface is composed of several layers: a top layer (1), a middle layer (2), and a base layer (3). The central section (2470 units) has a top layer (1) with a width of 1301 units and a middle layer (2) with a width of 1010 units. The side sections (1000 units) have a top layer (1) with a width of 1000 units and a middle layer (2) with a width of 1000 units. The base layer (3) is 100 units thick. The road surface is supported by a subgrade (4) and a base layer (5). The drawing includes various dimensions and labels (1-9) indicating different components and layers.
